

## StarGrab Safety Device

The **StarGrab** safety device for the suspended working platform is an anti tilting device based on the principal of a level platform. **StarGrab** has to be used in conjunction with a safety wire rope. Each safety wire rope passes through **StarGrab** safety device which locks the platform in place during a no load situation or if there is too much incline of the platform.

### StarGrab Technical Specification

Allowable Impact Load	22kN
Static Load	8kN
Wire Rope Diameter	8.3mm
Effective Tilting Angle	5°-12°
